

Changing the Size of your Monitor Display

Prepared by Dian Hofstad, TOA

Greenfield & Beverly Schools, BPS

1. Double-click the red & white ATI icon in the Task tray on the lower right-hand corner of the monitor screen.
2. Click Displays Manager from the column on the left side of the window.
3. Near the bottom of the window, in “Desktop area:”, click down arrow. From here you can select the size that best works for you. The “native” (natural, default) size is 1280 x 1024 but that may be too small for you. Other popular sizes are: 1024 x 768 and 800 x 600.
4. Click Apply and the image will temporarily change to the size selected. A window will pop up asking if you want to keep the settings. Select Yes, or No, or by default, the settings will return to the previous saved settings. If you like the selected setting, click Yes, then click Ok.
