

How To Flatten Text in Kid Pix

Prepared by Dian Hofstad, TOA
Greenfield & Beverly Schools, BPS

1. If you use both text and stamps, and/or stickers, on the same Kid Pix picture, you may notice that the text does not show up when the picture is printed.
2. To solve this problem, click Toolbox found on the top row of user commands, then select Flatten Text. In the Kid Pix window that pops up, select All.
3. Then you can select File – Print.
